

# Daily MLB Betting Edge Report - June 10, 2026

Generated: 2026-06-10 09:01 AM EDT

## Executive Summary

- Slate checked: 15 MLB scheduled games from MLB StatsAPI; 15 Bovada events matched for today's date.
- Candidates scored: 365; top 50 are curated by model EV, probability edge, sample quality, and correlation control.
- Core inputs: current-season team form, probable starters, pitcher K/BF, opponent K/PA, hitter game-log hit/TB/H+R+RBI rates, and live Bovada prices.
- Practical note: verify lineups, scratches, pitcher changes, weather, and price movement before betting.

# Top 50 Bets And Props

| #  | Confidence | Market             | Pick                                                                     | Odds | Model | Implied | Edge      | EV/\$ | Fair | Why                                                                                                                          |
|----|------------|--------------------|--------------------------------------------------------------------------|------|-------|---------|-----------|-------|------|------------------------------------------------------------------------------------------------------------------------------|

| Houston Astros @ Los Angeles Angels         | Peter Lambert vs Reid Detmers     | Bovada feed captured in model | 4.9-5.3     | Los Angeles Angels 53.1%    | 10.2 projected runs |

## Method Notes

- Game sides/totals: blended season and last-10 team run creation/prevention, home-field bump, and probable-starter run prevention.
- Pitcher strikeouts: Poisson tail from projected batters faced, pitcher K/BF, last-three workload, and opponent K/PA.
- Hitter props: current-season game-log rates blended with prior-year rates and league priors, adjusted for opposing starter contact profile and projected team runs.
- Home run card: HR/PA blend from current season, last-10 form, prior-year sample, league prior, opposing starter HR/BF and SLG allowed, team HR/PA, game run environment, ballpark factor, and live forecast-hour weather.
- Implied probabilities are no-vig for paired two-way markets and raw implied for one-sided player/alternate markets.
