Method Notes

- Game sides/totals: blended season and last-10 team run creation/prevention, home-field bump, and probable-starter run prevention.
- Pitcher strikeouts: Poisson tail from projected batters faced, pitcher K/BF, last-three workload, and opponent K/PA.
- Hitter props: current-season game-log rates blended with prior-year rates and league priors, adjusted for opposing starter contact profile and projected team runs.
- Home run card: HR/PA blend from current season, last-10 form, prior-year sample, league prior, opposing starter HR/BF and SLG allowed, team HR/PA, game run environment, ballpark factor, and live forecast-hour weather.
- Implied probabilities are no-vig for paired two-way markets and raw implied for one-sided player/alternate markets.
